Task Title:

Create HTML and CSS for Team Page

Task Description:

Developed a webpage to showcase the team members of the company, including their names, roles, and descriptions, using HTML and CSS.

Steps Taken:

1. Created the basic HTML structure with header, main, and footer sections.
2. Added navigation links in the header.
3. Structured the main content with sections for team members.
4. Applied CSS to style the header, main content, and footer.
5. Ensured responsive design using flexbox for the team member section.

Challenges Faced:

- Ensuring the design is responsive on different devices.
- Aligning team member images and text correctly within their containers.

Solutions Implemented:

- Used flexbox for a responsive layout.
- Applied consistent margins and padding to align content properly.
- Tested the webpage on multiple devices to ensure responsiveness.

Learnings:

- Improved understanding of flexbox for responsive design.
- Learned new techniques for aligning content using CSS.

Project Update:

- The team page is completed and fully functional.
- Next step is to integrate this page with the company's main website.
- Awaiting feedback from the design team for any further adjustments.
